

AG Mortgage Investment Trust, Inc. Investor Presentation NYSE: MITT

Forward Looking Statements

This presentation includes "forward-looking statements" within the meaning of the safe harbor provisions of the United States Private Securities Litigation Reform Act of 1995 related to dividends, our strategy related to our investments and portfolio, investment returns, return on equity, liquidity and financing, taxes, our assets, and our interest rate sensitivity. Forward-looking statements are based on estimates, projections, beliefs and assumptions of management of the Company at the time of such statements and are not guarantees of future performance. Forward-looking statements involve risks and uncertainties in predicting future results and conditions. Actual results could differ materially from those projected in these forward-looking statements due to a variety of factors, including, without limitation, changes in interest rates, changes in the yield curve, changes in prepayment rates, the availability and terms of financing, changes in the market value of our assets, general economic conditions, conditions in the market for Agency RMBS, Non-Agency RMBS, ABS and CMBS securities and loans, and legislative and regulatory changes that could adversely affect the business of the Company. Additional information concerning these and other risk factors are contained in the Company's fillings with the Securities and Exchange Commission ("SEC"), including its most recent Annual Report on Form 10-K and subsequent filings. Copies are available free of charge on the SEC's website, http://www.sec.gov/. All information in this presentation is as of September 11, 2017 (unless otherwise noted). The Company undertakes no duty to update any forward-looking statements to reflect any change in its expectations or any change in events, conditions or circumstances on which any such statement is based.

Q2 2017 Activity

- Deployed net equity of \$104.1 mm during the quarter
 - Increased our sector allocation to Agency RMBS on a hedged basis during the quarter
 - Increased our sector allocation to CRT as spreads lagged the broader rally that the legacy non-agency sector experienced
 - Participated, along with other Angelo, Gordon funds, in purchasing two single borrower subordinate securities backed by hotels
 - Participated, along with other Angelo, Gordon funds, in a credit card ABS bridge securitization
- MITT, along with other Angelo, Gordon funds, participated in a term securitization in April which refinanced
 previously securitized non-performing mortgage loans into a new lower cost, fixed rate long-term financing
 - The Company maintained exposure to the securitization through an interest in the subordinated tranches as well
 as through its ownership of the vertical risk retention portion of the securitization
- On May 5, 2017, the Company announced an "At the Market" Offering Program of Common Stock to sell up to \$100 million of its outstanding common stock
 - In Q2, MITT issued 99,932 shares of its common stock for net proceeds of \$1.8 mm

Quarter-Over-Quarter Snapshot

Non-GAAP Financial Information

In addition to the results presented in accordance with GAAP, this presentation includes certain non-GAAP financial results and financial metrics derived therefrom, which are calculated by including or excluding unconsolidated investments in affiliates, TBAs, and U.S. Treasuries, or by allocating non-investment portfolio related items based on their respective characteristics, as described in the footnotes. AG Mortgage Investment Trust, Inc.'s management believes that this non-GAAP financial information, when considered with the Company's GAAP financials, provide supplemental information useful for investors in evaluating the results of the Company's operations. This presentation also contains Core Earnings, a non-GAAP financial measure. The Company's presentation of its non-GAAP financial information may not be comparable to similarly-titled measures of other companies, who may use different calculations. This non-GAAP financial information should not be considered a substitute for, or superior to, the financial measures calculated in accordance with GAAP. Our GAAP financial results and the reconciliations from these results should be carefully evaluated.

Footnotes

- 1. The total investment portfolio at period end is calculated by summing the fair market value of our Agency RMBS, any long TBA position, Residential Investments, Commercial Investments, and ABS Investments, including securities and mortgage loans owned through investments in affiliates, exclusive of AG Arc LLC. Our Credit Investments refer to our Residential Investments, Commercial Investments, and ABS Investments. Refer to footnote 2 for more information on the GAAP accounting for certain items included in our investment portfolio. The percentage of fair market value includes any net TBA positions and securities and mortgage loans owned through investments in affiliates and is exclusive of AG Arc LLC. See footnote 13 for further details on AG Arc LLC.
- 2. Generally, when we purchase a security and employ leverage, the security is included in our assets and the leverage is reflected in our liabilities on the balance sheet as either Repurchase agreements or Securitized debt. Throughout this presentation where we disclose our investment portfolio and the related repurchase agreements that finance it, we have presented this information inclusive of (i) unconsolidated ownership interests in affiliates that are accounted for under GAAP using the equity method and (ii) long positions in TBAs, which are accounted for as derivatives under GAAP. This presentation excludes investments through AG Arc LLC unless otherwise noted. This presentation of our investment portfolio is consistent with how our management evaluates the business, and we believe this presentation, when considered with the GAAP presentation, provides supplemental information useful for investors in evaluating our investment portfolio and financial condition. See footnote 13 for further details on AG Arc LLC.
- 3. The Company allocates its equity by investment using the fair market value of its investment portfolio, less any associated leverage, inclusive of any long TBA position (at cost). The Company allocates all non-investment portfolio related items based on their respective characteristics in order to sum to stockholders' equity per the consolidated balance sheets. The Company's equity allocation method is a non-GAAP methodology and may not be comparable to similarly titled measures or concepts of other companies, who may use different calculations.
- 4. The yield on our investment portfolio represents an effective interest rate, which utilizes all estimates of future cash flows and adjusts for actual prepayment and cash flow activity as of quarter-end. The yield on our investment portfolio during the quarter was calculated by annualizing interest income for the quarter and dividing by our daily weighted average investment portfolio. This calculation excludes cash held by the Company and excludes any net TBA position. The calculation of weighted average yield is based on fair value. Weighted average yield also excludes any net TBA position.
- 5. Diluted per share figures are calculated using weighted average outstanding shares in accordance with GAAP. Per share figures are calculated using a denominator of all outstanding common shares including all shares granted to our Manager and our independent directors under our equity incentive plans as of quarter-end.
- 6. Book value uses stockholders' equity less net proceeds of the Company's 8.25% Series A and 8.00% Series B Cumulative Redeemable Preferred Stock as the numerator. See footnote 5 for description of per share calculation.
- 7. Core Earnings are defined as net income available to common stockholders excluding both unrealized and realized gains/(losses) on the sale or termination of securities and the related tax expense/benefit or disposition expense, if any, and on such sale or termination, including investments held in affiliated entities and derivatives. Core Earnings includes earnings from AG Arc LLC. Earnings from AG Arc LLC were \$0.2 million in the second quarter of 2017.
- 8. The economic return on equity for the quarter represents the change in book value per share from March 31, 2017 to June 30, 2017, plus the dividends declared over that period, divided by book value per share as of March 31, 2017. The annualized economic return on equity is the quarterly return on equity multiplied by four.
- 9. Net interest margin is calculated by subtracting the weighted average cost of funds from the weighted average yield for the Company's investment portfolio, which excludes cash held by the Company. Net interest margin also excludes any net TBA position. See footnotes 4 and 11 for further detail.

Footnotes (cont.)

- 10. "At Risk" Leverage was calculated by dividing total financing including any net TBA position by our GAAP stockholders' equity at quarter-end as of June 30, 2017. Our net TBA position (at cost) was \$310.5 million, \$93.4 million, \$(22.9) million, \$0.0 million, and \$103.5 million for the periods ending June 30, 2017, March 31, 2017, December 31, 2016, September 30, 2016, June 30,2016, respectively. Total financing at quarter-end, and when shown, daily weighted average total financing, includes repurchase agreements inclusive of repurchase agreements through affiliated entities, exclusive of any financing utilized through AG Arc LLC, plus the payable on all unsettled buys less the financing on all unsettled sells, securitized debt, and any net TBA position (at cost). Total financing excludes repurchase agreements and unsettled trades on U.S. Treasuries.
- 11. The cost of funds during the quarter was calculated by annualizing the sum of our interest expense and net interest settlements on all derivative instruments and dividing that sum by our daily weighted average total financing for the period. Interest earning/paying derivative instruments may include interest rate swaps and U.S. Treasuries. The cost of funds at quarter-end was calculated as the sum of the weighted average funding costs on total financing outstanding at quarter-end and the weighted average of the net pay rate on our interest rate swaps, the net receive/pay rate on our Treasury long and short positions, respectively, and the net receivable rate on our IO index derivatives, if any. Both elements of the cost of funds at quarter-end were weighted by the outstanding repurchase agreements and securitized debt outstanding at quarter-end, excluding repurchase agreements associated with U.S. Treasury positions. The cost of funds excludes any net TBA position.
- 12. The Company estimates duration based on third-party models. Different models and methodologies can produce different effective duration estimates for the same securities. We allocate the net duration by asset type based on the interest rate sensitivity. Duration includes any net TBA position. Duration does not include our equity interest in AG Arc LLC.
- 13. The Company invests in Arc Home LLC through AG Arc LLC, one of its indirect subsidiaries.
