In addition to the results presented in accordance with GAAP, this press release includes certain non-GAAP financial results and financial metrics derived therefrom, including Core Earnings, investment portfolio, financing arrangements, and economic leverage ratio, which are calculated by including or excluding unconsolidated investments in affiliates or, with respect to our equity allocation calculation, by allocating all non-investment portfolio related assets and liabilities to our investment portfolio categories based on the characteristics of such assets and liabilities, as described in the footnotes to this press release. ### NON-GAAP FINANCIAL MEASURE

This press release contains Core Earnings, a non-GAAP financial measure. Our presentation of Core Earnings may not be comparable to similarly-titled measures of other companies, who may use different calculations. This non-GAAP measure should not be considered a substitute for, or superior to, the financial measures calculated in accordance with GAAP. Our GAAP financial results and the reconciliations from these results should be carefully evaluated.

We define Core Earnings, a non-GAAP financial measure, as Net Income/(loss) available to common stockholders excluding (i) (a) unrealized gains/(losses) on loans, real estate securities, derivatives and other investments, inclusive of our investment in AG Arc, and (b) net realized gains/(losses) on the sale or termination of such instruments, (ii) any transaction related expenses incurred in connection with the acquisition, disposition, or securitization of our investments, (iii) accrued deal-related performance fees payable to third party operators to the extent the primary component of the accrual relates to items that are excluded from Core Earnings, such as unrealized and realized gains/(losses), (iv) realized and unrealized changes in the fair value of Arc Home's net mortgage servicing rights and the derivatives intended to offset changes in the fair value of those net mortgage servicing rights, (v) deferred taxes recognized at our taxable REIT subsidiaries, if any, and (vi) any gains/(losses) associated with exchange transactions on our common and preferred stock. Items (i) through (vi) above include any amount related to those items held in affiliated entities. Management considers the transaction related expenses referenced in (ii) above to be similar to realized losses incurred at the acquisition, disposition, or securitization of an asset and does not view them as being part of its core operations. Management views the exclusion described in (iv) above to be consistent with how it calculates Core Earnings on the remainder of its portfolio. Management excludes all deferred taxes because it believes deferred taxes are not representative of current operations. Core Earnings include the net interest income and other income earned on our investments on a yield adjusted basis, including TBA dollar roll income/(loss) or any other investment activity that may earn or pay net interest or its economic equivalent.

A reconciliation of GAAP Net Income/(loss) available to common stockholders to Core Earnings for the three months ended March 31, 2022 and 2021 is set forth below (in thousands, except per share data):

(b) For the three months ended March 31, 2022 and 2021, \$4.4 million or \$0.18 per share and \$2.6 million or \$0.18 per share, respectively, of realized and unrealized changes in the fair value of Arc Home's net mortgage servicing rights and corresponding derivatives were excluded from Core Earnings per diluted share, net of deferred tax expense. Additionally, for the three months ended March 31, 2022 and 2021, \$(2.5) million or \$(0.10) per share and \$0.6 million or \$0.04 per share, respectively, of unrealized changes in the fair value of Arc Home were excluded from Core Earnings.

(a) Core Earnings excludes our portion of gains recorded by Arc Home in connection with the sale of residential mortgage loans to us. We eliminated such gains recognized by Arc Home and also decreased the cost basis of the underlying loans we purchased by the same amount. Upon reducing our cost basis, unrealized gains are recorded within net income based on the fair value of the underlying loans at quarter end.

(b) Core Earnings excludes unrealized gains in the fair value of Arc Home's MSRs, net of deferred tax expense.

(c) All per share amounts for all periods presented have been adjusted to reflect the one-for-three reverse stock split.

#### Footnotes

- As of March 31, 2022, book value is calculated using stockholders' equity less net proceeds of our cumulative redeemable preferred stock (\$220.5 million) as the numerator. As of March 31, 2022, adjusted book value is calculated using stockholders' equity less the liquidation preference of our cumulative redeemable preferred stock ( \$228.0 million) as the numerator.
- The economic return on equity represents the change in adjusted book value per share during the period, plus the common dividends declared over that period, divided by adjusted book value per share from the prior period.
- Diluted per share figures are calculated using diluted weighted average outstanding shares in accordance with GAAP.
- The investment portfolio at period end consists of the net carrying value of our Residential Investments and Agency RMBS, and where applicable, any long positions in TBAs, including mortgage loans and securities owned through investments in affiliates, exclusive of AG Arc LLC. Our Residential Investments and Agency RMBS are held at fair value. Refer to footnote 5 for more information on the GAAP accounting for certain items included in our investment portfolio. The percentage of fair value includes any net TBA positions and mortgage loans and securities owned through investments in affiliates and is exclusive of AG Arc LLC.
- Generally, when we purchase an investment and finance it, the investment is included in our assets and the financing is reflected in our liabilities on our consolidated balance sheet as either "Financing arrangements" or "Securitized debt, at fair value." Throughout this press release where we disclose our investment portfolio and the related financing, we have presented this information inclusive of (i) mortgage loans and securities owned through investments in affiliates that are accounted for under GAAP using the equity method and, where applicable, (ii) long positions in TBAs, which are accounted for as derivatives under GAAP. This presentation excludes investments through AG Arc LLC unless otherwise noted.
- The Economic Leverage Ratio is calculated by dividing total Economic Leverage, including any net TBA position, by our GAAP stockholders' equity at quarter-end. Total Economic Leverage at quarter-end includes recourse financing arrangements recorded within "Investments in debt and equity of affiliates" exclusive of any financing utilized through AG Arc LLC, plus the payable on all unsettled buys less the financing on all unsettled sells and any net TBA position (at cost). Total Economic Leverage excludes any non-recourse financing arrangements. Non-recourse financing arrangements include securitized debt, as well as financing on certain Non-QM Loans. Our obligation to repay our non-recourse financing arrangements is limited to the value of the pledged collateral thereunder and does not create a general claim against us as an entity.
- Net interest margin is calculated by subtracting the weighted average cost of funds from the weighted average yield for our investment portfolio, which excludes cash held.
- The cost of funds at quarter-end is calculated as the sum of (i) the weighted average funding costs on recourse financing arrangements outstanding at quarter-end, (ii) the weighted average funding costs on non-recourse financing arrangements, and (iii) the weighted average of the net pay rate on our interest rate swaps. The cost of funds at quarter-end are weighted by the outstanding financing arrangements at quarter-end, including any non-recourse financing arrangements.
- We allocate our equity by investment using the fair value of our investment portfolio, less any associated leverage, inclusive of any long TBA position (at cost). We allocate all non-investment portfolio related assets and liabilities to our investment portfolio categories based on the characteristics of such assets and liabilities in order to sum to stockholders' equity per the consolidated balance sheets. Our equity allocation method is a non-GAAP methodology and may not be comparable to the similarly titled measure or concepts of other companies, who may use different calculations and allocation methodologies.
- We invest in Arc Home LLC through AG Arc LLC, one of our equity method investees. Our investment in AG Arc LLC is \$54.1 million as of March 31, 2022, representing a 44.6% ownership interest.
